DECLASSIFIED

Friday, January 30, 1953

E. was due to go to New York this morning, and I this afternoon, (trysting place, the River Club) and return to Washington tomorrow. Instead, she was stricken with flu on Tuesday, and I followed suit last night. She has now partially recovered, but is weak, while I am sorely pained with high fever and all the unpleasantnesses of grippe, or whatever the epidemic is. I have swallowed every sulphur potion (or indeed other pill) offered me with no result apparent except a hotter temperature, splitting headaches, and no appetite whatever. Foster Dulles and Stassen left for Europe this morning.
